## Categories of ships to which the use of traffic separation schemes is recommended

(a) Tankers as defined in Annex I of the International Convention for the Prevention of Pollution from Ships, 1973, as modified by the Protocol of 1978 (MARPOL 73/78);
(b) Chemical tankers carrying noxious liquid substances in bulk assessed or provisionally assessed as Category X or Y in Annex II to MARPOL 73/78;
(c) Ships carrying radioactive substances as defined in the International Code for the Safe Carriage of Packaged Irradiated Nuclear Fuel, Plutonium and High-Level Radioactive Wastes on board Ships (INF Code);
(d) Nuclear-powered ships; and
(e) Ships of 5,000 gross tonnage and upwards.

## International voyages to or from ports in Norway

Ships should follow the routeing schemes until a course to port which maintains a safe distance from the coast can be clearly set.

The routeing schemes do not apply to ships in traffic between Norwegian ports on the mainland or to passenger ships in regular service with calls at least once a week between Norwegian and international ports.
