

## **How to register in the Environmental Ship Index ESI**

Entering into the ESI program is quite straightforward: Having entered into the home page [www.environmentalshipindex.org](http://www.environmentalshipindex.org), click on go to the ESI **login** page and click on **Register**.

On the page that opens you can indicate your capacity as Ship Owner. When entering an e-mail address, consider creating an ESI specific e-mail address that may be used by the person(s) that will enter the data into the database, for example [esi@youraddress.com](mailto:esi@youraddress.com), instead of entering your own address.

After having submitted the company data you will be provided with a password. Since the password that will be transmitted is somewhat difficult to remember, you are advised to change it as soon as you have entered your company pages.

In the company pages you can enter the details of your vessels. The set-up will automatically lead you through the process.

Finally, a small but important detail, participation for Ship Owners is free and no costs are involved for entering ships into the database.

### **Contact person:**

Capt. Fer van de Laar

ESI Administrator
